

Buddy Holly, That's What They Say

There comes a time for everybody
when true love will come your way
there comes a time for everybody
that's what they tell me - that's what they say

I didn't hear them say a word of when that time will be
I only know that what they say
has not come true for me

You just keeping waiting and love will come your way
that's what they tell me - that's what they say
