Buffy Sainte-Marie, Dance Me Around

And when I think about all I missed
All those kisses that you gave to someone else
I wish I'd been around
But I was up there in the air
while you were over here
with both feet on the ground

Who'd've ever thought it that it should been you and me Got to find a way to show it This effect you have on me

When I think about what I missed I wish I coulda been your girl

And when I think about all I've lost I could never count the cost Cause of what we've got for free And now it's later, maybe better late than never I don't know But here you are with me

Dance Me Around again Hold me like it's never gonna end Finally I've found somebody who's always been a friend

When I think about what I missed I wish I coulda been your girl.
