

# Built To Spill, Alarmed

in the hurry of the past  
i forgot to make it last  
simple choices made too fast  
vie or die, i didn't count  
i'm alarmed and i can't help from  
crashing onto this island we've become  
words for fighting, words for fun  
they've all melted into one  
on the tip of every tongue  
like the new name for the sun  
i'm alarmed and i can't recover from  
crashing onto this island we've become  
alright now, don't decide about that now  
oh how can you blame the only one  
ever stay, ever stay, ever stay around and you would  
never say never say all the harms been done  
and you were  
all so gone oh so long, so long  
did you make it all wrong, so wrong  
did you wait oh so long, so long  
did you take it all wrong, so wrong
