

Built To Spill, Alarmed

in the hurry of the past
i forgot to make it last
simple choices made too fast
vie or die, i didn't count
i'm alarmed and i can't help from
crashing onto this island we've become
words for fighting, words for fun
they've all melted into one
on the tip of every tongue
like the new name for the sun
i'm alarmed and i can't recover from
crashing onto this island we've become
alright now, don't decide about that now
oh how can you blame the only one
ever stay, ever stay, ever stay around and you would
never say never say all the harms been done
and you were
all so gone oh so long, so long
did you make it all wrong, so wrong
did you wait oh so long, so long
did you take it all wrong, so wrong
