

Bumblefoot, Normal

I just got new medication
After years of hibernation
I can walk outside for the first time
And let the sunshine touch my head

I never went an hour without
Mutilating from the inside out
But now everything's fine for the first time
I'm feeling like I'm born again

Uh-huh

I try, but can't explain it
I said too much
And I feel so liberated
Feels like love
It's so nice to be normal
To be normal for a change

I used to scare up at the sky
And watch the little worm in my eye
But now all I wanna do is look at you
And fill your darkest room with light

Uh-huh

And I try, but can't explain it
I said too much
And I feel so liberated
Feels like love
It's so nice to be normal
To be normal for a change
Yeah it's so nice to be normal
But it still feels kinda strange

The noise has left my head
The voice inside is dead
Now I don't hear a sound
I never knew silence could be so loud

And I try, but can't explain it
I said too much
Yeah I feel so liberated
Feels like love
It's so nice to be normal
To be normal for a change

Yeah, it's so nice to be normal
To be normal for a change
Oh it's so nice to be normal
To be normal
Oh it's so nice to be normal
To be normal

It's so nice to be normal
But it still feels kinda strange
