

Burden Brothers, Do For Me

I'll stand next to you
And you'll stand next to me
You try not to move
And I'll try not to breath

I'll stand next to you
And you'll stand next to me
We both stand alone
Walking in our sleep

Let me inside your head
(I'll never let you in)
Where is your innocence
(Guess it's already dead)
You're miles away from me
(Right where I want you to be)
You're miles away from me
You're miles away...

You'll lay next to me
And I'll lay next to you
Shiver in the sheets
Stare out at the moon

You'll lay next to me
And I'll lay next to you
We can live a lie
We can live a truth

Your heart is broken
(I'll never let you in)
Where is your confidence
(Guess it's already dead)
You've finally broken free
(Right where I want you to be)
You're miles away from me
You're miles away...

You can do for me
Like I can do for you...

Let me inside your head
(I'll never let you in)
Let's put this thing to bed
(Guess it's already dead)
You're miles away from me
(Right where I want you to be)
You're miles away from me
You're miles away...
