

Burton Cummings, Firefly

Firefly flashin' on a sticky August night
Children tryin' to put you in a jar and watch your light
And as they study your magical latern
I know what you're thinking of
They are taking away your chance tonight of finding somebody to love

You gotta use the night
You gotta get away
You know how to use what you got now
You're hot so make your play
And there's a lady out there just a waitin' to see your flash in the sky
And she's bearin' a torch burnin' just for you
And burning it twice as bright

Firefly
Make yourself glow
So she gonna notice you before the night is gone
Firefly
You're lonely, I know
You're hoping she'll be with you before the night is gone
Firefly
You know I'm alot like you

Firefly
Make yourself glow
Before the night goes runnin'
Firefly
Make yourself glow
Night goes runnin'
And mornin' come callin'
Firefly
Make yourself glow...
