Butt Trumpet, Dicktatorship

Never mind the painful cries

Just ignore her many lies Let her rest when she passes out While she's awake, let her shout Ouickly pour her another cup Hold her hand when she shoots up F**k her when she needs a friend The start the shit all over again Don't f**k with my head, she said Don't! Hide the razorblades from the cop Call the doctor when the bleeding won't stop Kiss her, tell her she's okay Then f**k around while she's away Bring her home, give her a line Now you got her feeling fine Take a twenty from her purse Always remember: business first! Tell her you love her every day Beat her when she tries to escape Watch her as she loses weight Always tell her she looks great Don't f**k with my head, she said Never mind her desperate pleas Lock the door and hide the keys Tell her friends she's doing great Watch her puke and masturbate Lie her down when she starts to trip

Wipe the tears off of her face
F**k her as she starts to space
Does it f**k with your head she's dead?

Wipe the drool off of her lip
