## By The Tree, These Days

You left town alone the day And set your sails for another place All this time I thought I knew That you would be mine, and I would be yours too

Yeah, yeah, these days, yeah I need to be with you and spend a little time While your gone I will wait here for you

Chorus: I'll be with you when you feel no emotion I'll be with you when you can't find a way out I'll be with you when you feel no emotion I will wait for you, I will be here for you

You went to places you've never been You got into things you never thought that you'd get in Fell in deep into a wishing well Looking for freedom you found a prison cell
