Cadaveres De Tortugas, Follow Me Down

Now I can see they're not any better Their lies give 'em some more chances Lil' more time but can't play with fate It's too late to hide from my hate

I know what will be my weapon I use yours: that goddamn silence Now I arm myself and I turn Against you in your perfect world

I empower from down under Tear the ancient instincts open They are leading me through my life I feed myself through my roots

My pain was only a lesson Learned who I really can count on This taught me how to live my life Overcome myself to survive

And I want to survive you too Treading down on the betrayers I'm gonna wade up to my knees the bleeding tears of the weak
