

Cadaveres De Tortugas, Let Us Live

Hope was always a friend of mine
My trust in life won't ever slip by

No way! No I won't
be afraid of the road in front of me
Times are changing I'm not
Even if it confronts me with reality

The shackles are tighter
The top's even higher
We need to be wiser to move on

Why don't you let us
live our lives?! Let us be who we are
While you're stuck in here, for us nothing's too far
Can't fool our thoughts, we know what's going down
And one day we come out of the background
Why don't you let us
live our lives?! We don't believe your lies
About the future promised to be clear and bright
Let us live - And fool yourself. That
everything's alright
Oh god. Nothing's alright
