

Cage, March Of The Cage

We take on the world wherever we go. Nothing will stop us that is our oath. All of the evil beneath crawling up from below. We will deliver defeat we won't take anymore. Marching forever we go but we want to go higher. Follow us straight down the road and into the fire

With infinite malice we shatter the night and then we destroy in the name of what's right. Under our flickering glow like a beacon we shine. The fallen will cower in fear to our all seeing eye

[Chorus]
The frequency that we invoke is your purifier

Listen your life in danger. Fortune and fame don't make them a stranger. Follow your heart and you're laughing at danger. Run to your dreams and go!

[Chorus]
March of the CAGE!
