

Cancerslug, Death To Gaia

you are the cancer of the world so do your f**king job
building tumors of concrete and steel
fill that whore mother natures lungs with smog
death to gaia
take pride in the horror you bring to a life thats already ost
there is nothing wrong with dieing doing what you love
so kill the world at any cost
death to gaia
there is no turning back the job is already done
so lets blow this f**ker up
and create a star that is brighter than the sun
death to gaia
dig a hole to the planets core
take it to the mothers cunt
its never easy to be a disease but it sure is f**king fun
