

# Cannibal Corpse, To Decompose

Cadaver filled carcasses flood the land  
Methodically emptied of bone and blood  
Left to be one with the dirt again  
To decompose  
It will end in the dirt again

He starts with the draining of liquid mass  
His victims lie helpless and wide awake  
Bodies are shriveled to skeletal form  
To decompose  
Victims die helpless while siphoned awake

Sacrificing mortal beings never to subside  
Savage beatings pulverized and no one heard the cries  
Taking all the innards out of every single corpse  
Decomposing slaughtered waits to rot

Cadaver filled carcasses flood the land  
Methodically emptied of bone and blood  
Left to be one with the dirt again  
To decompose  
It will all end in the dirt again

Bone matter is now removed from the skin  
Collection of remains used to impale  
Scattered skulls with oozing brains left unfound  
To decompose  
Splitting the spines like he's done it before

Sacrificing mortal beings never to subside  
Savage beatings pulverized and no one heard the cries  
Taking all the innards out of every single corpse  
Decomposing slaughtered wait to rot

Morbid fascination with the dead  
Bones blood brutally dissolved  
Constant threat of killing all he sees  
Revenge always gets involved

Morbid inclination warps his mind  
Terror saturates his eyes  
Foreseen decimation feeds his mind  
Starving for the next attack

Cadaver filled carcasses flood the land  
Methodically emptied of bone and blood  
Left to be one with the dirt again  
To decompose  
It will all end in the dirt again

Left to be one with the dirt again  
It all will end in the dirt again  
Left to be one with the dirt again  
To decompose  
It all will end in the dirt again

Sacrificing mortal beings never to subside  
Savage beatings pulverized and no one heard the cries  
Taking all the innards out of every single corpse  
Decomposing slaughtered waits to rot
