

Cannons, Loving You

Waiting for the night to come
Cus I been hiding from sun (ahhhhh)
Everytime I hear the wind
Ya, I can feel it rolling in
Rolling and rolling
Rolling and rolling

Tell me what you wanna do
Cus I been thinking me and you
(could, ahhhhh ahhh)
Wontcha say what's on your mind
Cus I been running out of time
Running and running
Running and running

When the day is done
And the lights are gone
There's something in the air

Can you hear the voices calling
I was made for loving you
Don't be scared we're only falling
I love the way our bodies move
I was made for loving you

My Heart is beating like a drum
And my head is numb
(ahhhh)
We're getting lost in the rhythm
Of the rattle and hum

And when the day breaks
However long that it takes
We can leave our headaches
Behind

Can you hear the voices calling
I was made for loving you
Don't be scared we're only falling
I love the way our bodies move
I was made for loving you

When the day is done
And the lights are gone
There's something in the air

Can you hear the voices calling
I was made for loving you
Don't be scared we're only falling
I love the way our bodies move
