

# Cans, Forever Ends

I see you comin', lookin' shiny and new  
Just like a bullet in a brand new gun  
You are the pony on a merry-go-round  
All painted up and you're so ready to run

I feel the lightning hanging over the hill  
And then I watch you on your rainbow ride  
I hear you comin' from the top of the world  
And you are beggin' me to be by your side again

No, not me this time I'm gonna be strong  
No, not we this time you're all on your own

It's a leap of faith that I just can't make  
Something' that I won't believe in again  
And it's killin' me but it's got to be  
This is where our forever ends

You say forever like you know what it is  
And then you show me that you don't have a clue  
There's still some love in me that let's me forgive  
But I will guarantee that I am so over you, you know

No, not me this time I'm gonna be strong  
No, not we this time you're all on your own

It's a leap of faith that I just can't make  
Something' that I won't believe in again  
And it's killin' me but it's got to be  
This is where our forever ends

Watching as dreams turn into smoke  
In your hands they slip away  
Beating that love just like a drum  
You are the child with all the games you play

No, not me this time I'm gonna be strong  
No, not we this time you're all on your own

It's a leap of faith that I just can't make  
Something' that I won't believe in again  
And it's killin' me but it's got to be  
This is where our forever ends
