

Capri Everitt, Break

I hope your happier than even before
I hope she's beautiful all that I was and more
I hope you hold her closely when she sleeps by your side
Makes you feel alive inside

Did you take her to our favorite spot
Kiss her on the same rooftop
Did you ever
Think about the love we lost
Think about the lines you crossed
When I love you falls out of her lips
I hope she lies
like you did

I hope she break break breaks your heart
Like you played played played with mine
Was it fake fake from the start
Or did you change with time
I hope she break break breaks your heart
Like you played played played with mine
Was it fake fake from the start
Or did you change with time

Trust me when I say to you
it's hard to let go of pain that you caused me
for your ego
was all my love in vain
can you imagine a forever in her eyes
well I hope she lies
like you did

Did you take her to our favorite spot
Kiss her on the same rooftop
Did you ever
Think about the love we lost
Think about the lines you crossed
When I love you falls out of her lips
I hope she lies
like you did

I hope she break break breaks your heart
Like you played played played with mine
Was it fake fake from the start
Or did you change with time
I hope she break break breaks your heart
Like you played played played with mine
Was it fake fake from the start
Or did you change with time

Did you take her to my favorite spot
Did you think about the lines you crossed
