

# Caravan, Better You Take It All

Feelin' bad, back against the wall  
Sick and tired cos you've heard it all  
You've been around and still you find  
You're lookin' for the answer

You know I'm by when the drinks are cold  
And then I looked at you like you were old  
Why did I noticed you at all  
----- they can't help it

You gotta drink just to pass the time  
You want a beer, won't you get the wine?  
You say it's all, it's all just fine  
Cos you're talkin' to the bar maid

You said you've dreams about life abroad  
And then a husband is inside the fraud  
You said you're no familiar car  
But you wanna take advantage

Oh, what a night!  
Likely you just can't fail to answer the call  
Well no one said I doubt old sun  
I bet you wanna take it all

You gotta dance when you're feelin' right  
You got a hand in the pale moonlight  
You gotta hum it on and on  
And then how you gonna chance it

You think you'd better go back to the bar  
She says why don't you come and take a shower  
You can't believe you luck so far  
And you're shakin' with excitement

Holley, I wanna  
Holley, I wanna  
All they say I know it is right  
When I feel in my heart

Holley, I wanna  
Holley, I wanna  
Heaven knows what the future will be  
-----

Oh, what a night!  
Likely you just can't fail to answer the call  
Well no one said I doubt old sun  
I bet you wanna take it all

You said you never liked the march of touch  
And then you got up on a ----- approach  
And you were he, and she was she  
It's a perfect situation

And then she said she want a -----  
You're sure you want -----  
If you can call you took it all  
You just kept on saying, you just kept on saying...
