

# Caravan, Here Am I

When doin' it all late at night  
I feel a thousand faces  
All lookin' at me pale and white  
From most peculiar places

They keep tellin' me that my life  
Tell me that my life could be better  
If all I want is love

My hands are holding traffic jams  
That's full of crazy ladies  
All trying to get home at the same time  
To feed full ----- of babies

And all they want is life  
All they want is life to get better  
Cause they like them going for love  
Yes I'm going for love - I'm taking arms

Stand, know what you can do  
With all the ----- times you've given me  
I don't wanna stay, going where I'm feeling even sure it's taking  
Why, you can see there's been a definite change in my eyes  
Love, where are you, I'm needing you to keep me satisfied

So here am I, here am I

I never did ask what I might have been  
When I could see the faces  
I could have stayed home and got stuck right in  
Or gone a million places

But then I wanted life  
All I wanted was life to get better  
So I could feel your love

So I could say to you  
Know what you can do with everything  
Loving' all the same, be a pain  
And still be what you need if you wanted to  
Life it's through our love it's making all the change in my eyes  
Love need no shove to keep the life I lead so satisfying

So here am I, here am I...
