

# Caribou, Sandy

Now I'm divided  
Like a flock of birds when excited  
And picture circles in the sky  
You can't believe me  
Like all of the others who leave me  
And feel their shapes across the aisle

Twirl things around us  
And the shadows they left as they found us  
Or running fingers through your hair  
It's life that ended and the tracks that they left as they ascended  
They'll picture circles in the air

(refrain)  
Sometimes in her eyes I see forever  
I can't believe what we've found  
I know in time we'll be together  
And now our love will make this sound

Now I'm divided  
Like a flock of birds when excited  
And picture circles in the sky  
You can't believe me  
Like all of the others who leave me  
And feel their shapes across the aisle

(repeat refrain x2)
