

Carl Belew, I Know But Tell Me

I know you smiled at him and then you made the light grow dim
I know but tell me no it didn't happen
I try again to understand that he just tried to hold your hand
I know but tell me no it didn't happen
I know before I ask you the answer you must give
For if you say it happened I no longer want to live
You didn't know just what to do when he told you I was untrue
I know but tell me no it didn't happen
[fiddle - steel]
I know before I ask you...
