

# Carlene Carter, Something Already Gone

(from the Maverick soundtrack)  
(Carlene Carter/Al Anderson)

There was a time  
When every thing felt right  
I was your darlin' girl  
You saw me in a perfect light  
But baby what's goin' on  
Everything's feelin' wrong  
Don't wanta be holding on  
To something already gone

Oh whoa whoa  
Something already gone

We used to laugh a lot  
And hold each other tight  
You were my love  
And did every little thing just right  
What I'm wishin' for  
Is we should be kissin' more  
Don't want to be missin' no  
Something already gone

Something already gone and lost forever  
I wish there was something we could do  
If we'd just put our hearts together  
Just give me something to hold on to  
Don't wanta be lost without your sweet love  
I want you to hold me all night long  
But something here inside says "Something already gone"

Something already gone and lost forever  
I wish there was something we could do  
If we'd just put our hearts together  
Just give me something to hold on to  
Don't wanta be lost without your sweet love  
I want you to hold me all night long  
But something here inside says "Something already gone"
