

Carlos Santana, One With The Sun

One With The Sun

You in time with music of the universe
Doctor of mother earth
We are all one
We are all one with the sun

Reflecting words to say
Silently I want to be
With symphonies of stars
You came singing through my soul
I see you in the golden sunset
Glowing through my soul
We are all one with the sun

In the summertime we went to the sea
How smooth plate how calm against
These skies dancing in your eyes.
