Carlos Santana, She Can't Let Go

She has the innocence and vision of a child How can I ever really know her? Were riding on a carousel Thats running wild Around in circles til its over

And every time we reach the end We go around again cause

Chorus:
She cant let go
And I dont wanna tell her no
She cant let go
And I dont wanna tell her no

I see her starin out the window at the rain But she will never leave the fire Sometimes it burns all night and covers up the pain Sometimes it only leaves us tired

And every time we reach the end We go around again cause

Repeat chorus
