

Caro Emerald, COMPLETELY

I recall
The days that I was single
Used to flirt
Fool around and mingle
Then you came along
And suddenly it changed
Completely

Some girls fall
And others keep on playin'
Forget the now
And keep on yesterdayin'
Now I know it's wrong
You came along, I changed
Completely

Darling do you know
The sky performs a show
Each and every night before I sleep
When I look up at the stars
In the galaxy near and far
I'm always with you baby
Wherever you are

I look at you
And I sure see a genius
It's kinda crazy
But you don't think I mean this
You filled up my heart
And I know that I changed
Completely

Darling do you know
The sky performs a show
Each and every night before I sleep
When I look up at the stars
In the galaxy near and far
I'm always with you baby
Wherever you are

If I'm alone
I still feel protected
By your love
It's never misdirected
When you came along
I'm happy my life changed
Completely

I'm talking to you
You filled up my heart
And I know that I changed
Completely
