

Case, Can't Force Love

My love

It's been so many moments since we touched
Been so many motions since the last time we kissed
Just can't seem to heal
The time, the pain just hides deeper in my heart
And the loneliness just keeps on growing

But I do miss you, I do

I mean it, I miss us

And I realize now that everything I did was just wrong

You can't make a man love a woman

You damn sure can't make a woman love a man
