

Cast, Compared To You

Compared to what you do
I've seen nothing of you
Compared to what you say
Your words just fall through the day
Idle words on their way
Compared to where you've been
And all these images you've seen
Compared to what you feel
You don't feel nothing that's real
Let the light you shine reveal
It's good to know that
You want me there
And I'd like to show that
You want me there
And we like to show that
We need you there
It's good to care
When you say the words
That we are longing to hear
When you get to see
What your loving does to me
Set my river running free
Compared to what you do
Compared to what you do
The treasure that you bring
Makes my heart want to sing
All the things you do
Reflect this image deep in you
So let the love you've got shine through
It's good to know that
You want me there
And I'd like to show that
It's good to care
And it's good to know that
You want me there
And we'd like to show that
It's good to care
