

Cathy Dennis, One Life

One life, we got it
Right here just you and me
One life, divided
Till you can get to me
When I look into your eyes
I see the man I need, yes I do
When I think of fantasies,
I only think of you, only you
You can take me to a place, amongst the stars
Touch a part of me that opens up my heart
Heaven only knows the way you make me feel
Come and let me bring your dreams to real
One life, we got it
Right here just you and me
One life, divided
Till you can get to me
Did I tell you, I'm knocked over
By the things that you do, that you do
Let me tell you that these eyes of mine
Are just for you, only you
You can take me to a place, amongst the stars
Touch a part of me that opens up my heart
Heaven only knows the way you make me feel
Come and let me bring your dreams to real
One life, we got it
Right here just you and me
One life, divided
Till you can get to me
One life, we got it
Right here just you and me
One life, divided
Till you can get to me
You're the only one,
you've got to show me what you feel
Make the most of life and see
There's so much to reveal
Now's the time to move
Get up and finish what you start
'Cos only you can make it happen
One life, we got it
Right here just you and me
One life, divided
Till you came here to me
All we got's one life to live
All we got's one life to live
One life, we got it
Right here, just you and me
