

# Cathy Dennis, Touch Me

We're starting it over, we're making way for destiny  
A time to turn over, a better life for you and me  
A new recreation, to channel all this energy, hmmm  
Let's solve the equation, I need to keep you close to me  
So baby let your conscience go,  
There's no turning back when love takes hold  
Hold me baby, drive me crazy  
Touch me all night long  
Make me love you, kiss and hug you  
Touch me all night long

The more that I see you  
The more I know that love belongs  
With you in my mind boy  
I wouldn't know what's right from wrong

Cos love will take over  
And leave you out of sight and mind  
You've got to go with the feeling  
And trust fate to be kind  
And baby let your conscience go  
There's no turning back when love takes hold  
Hold me baby, drive me crazy  
Touch me all night long  
Make me love you, kiss and hug you  
Touch me all night long

Hold me baby, drive me crazy  
Touch me all night long  
Make me love you, kiss and hug you  
Touch me all night long

And baby let your conscience go  
There's no turning back when love takes hold  
Hold me baby, drive me crazy  
Touch me all night long  
Make me love you, kiss and hug you  
Touch me all night long

Repeat to fade
