

Ceaser, Keep Eleven On

Ceaser

Miscellaneous

Keep Eleven On

Keep Eleven On

Well I surely can show you

Where you can go stuffing the rest of your memories

Another downer for the really down

We used to run around the secret cemetery

It had a chemistry you rarely find

This glue can keep it all together

But it can break like a glass when you blink at it, just like that

And we keep eleven on, just this once

Someone has to be there just in case it's on for real

I can never spend a day without the real appeal

And maybe b-baby it's as real as a clock

So let it come, and let it come, and let it come, and let it rock

Well I haven't come this whole way just to put you down

It's been a long and winding day

The superglue can keep it all together now

But there's a price that you will have to name

This glue can keep it all together

But it can break like a glass when you blink at it, just like that

And we keep eleven on, just this once

Keep it on, eleven on, keep it

Keep it on, eleven on, keep it on

Keep it on, eleven, eleven on

Someone has to be there just in case it's on for real

I can never spend a day without the real appeal

And maybe b-baby it's as real as as clock

So let it come, and let it come, and let it come, and let it rock

Someone has to be there just in case it's on for real

I can never spend a day without the real appeal

And maybe b-baby it's as real as as clock

So let it come

Keep it on, eleven on, keep it

Keep it on, eleven on, keep it on

Keep it on, eleven, eleven on
