

# Celine Dion, Somebody Loves Somebody

I don't want another piece of your mind  
So take it somewhere else for the night  
'Cause I can't take another goodbye

If you wanna bite, bite your tongue  
Before you explode  
But don't let this get out of control  
You don't want me to leave you alone

When somebody loves somebody  
That's the way it's supposed to be  
'Cause she knows nobody else would put up with your games, oh  
I don't believe you're loving him no more, no, no  
That's not the way it is when somebody loves somebody

When somebody loves somebody

Wait, I'm hearing every word that you say  
You wonder if you made a mistake  
It's written all over your face  
You know it's too late  
We've already fallen in love  
Tell me, it is asking too much  
For you to stick it out when it's dark  
Is it ever enough?

When somebody loves somebody  
That's the way it's supposed to be  
'Cause she knows nobody else would put up with your games, oh  
I don't believe you're loving him no more, no, no  
That's not the way it is somebody loves somebody

When somebody loves somebody

Some people live their lives  
Never believing in love  
I don't want that for us

When somebody loves somebody  
That's the way it's supposed to be  
'Cause she knows nobody else would put up with your games, oh  
I don't believe you're loving him no more, no, no  
That's not the way it is somebody loves somebody
