

Cerrone, Supernature

Once upon a time, science opened up the door
We would feed the hungry fields 'til they couldn't eat no more
But the potions that we made touched the creatures down below
And they grew up in a way that we'd never seen before
Supernature, supernature
Supernature, supernature
They were angry with the man 'cause he changed their way of life
And they take that sweet revenge as they trample through the night
For hundred miles or more you could hear the people cry
But there is nothing you can do even God is on their side
(God is on, God is on, God is on their side)
Supernature, supernature
Supernature, supernature
Cars will break the lights, come flowing in the air
The creature will decide who goes where
How can I explain things are different today
Darkness all around no one makes a sound
Such a sad affair no one seems to care
Supernature, supernature
Supernature, supernature
Better watch out there's no way to stop it now
You can't escape it's too late
Look what you've done there's no place that you could run
The monsters made we must pay
Maybe nature has a plan to control the ways of man
He must start from scratch again, many battles must he win
'Til he earns his place on earth like the other creatures do
Will there be a happy end now that all depends on you
Supernature, supernature
Supernature, supernature
Supernature, supernature
Supernature, supernature
Supernature, supernature
Supernature, supernature
Supernature
