

# Chante Moore & JoJo, I See You In A Different Light

I see you in a different light  
Candle light, moon light  
I see you in a different way  
Through different eyes and it's so nice  
We were just friends, that's how it started  
You told me your secrets and I told you mine  
You were always there with a shoulder  
To lean on anytime  
Now something's changed  
Nothing's the same, no, no  
You're here beside me  
I see you in a different light  
Candle light, moon light  
I see you in a different way  
Through different eyes and it's so nice  
I see you like I've never seen you before  
The way I wanna see you much more  
Oh tonight, tonight  
I see you in a different light  
You were the one that I'd always turn to  
The one I could talk to, baby, the one I could trust  
Who would of ever dreamed  
We would be here together making love?  
The sweetest surprise  
Has come to my life  
That you're here beside me  
And I see you in a different light  
Candle light, moon light  
I see you in a different way  
Through different eyes and it's so nice  
I see you like I've never seen you before  
The way I wanna see you much more  
Oh tonight, tonight  
I see you in a different light  
When did your kisses get so sweet baby?  
Baby, it's such a sweet surprise to me, me  
To look into your eyes  
And I see you in a different light  
Candle light, moon light  
I see you in a different way  
Through different eyes and it's so nice  
I see you like I've never seen you before  
The way I wanna see you much more  
Oh tonight, tonight  
I see you in a different light  
Candle light, moon light  
Different way  
I see you  
I see you baby  
Like I've never seen you before  
I see you baby  
I see you baby  
I see you baby
