## Charlie Wilson, Thru It All

[VERSE 1:]

Not one to have a loss for words

What I have to say you've already heard

But I don't think it will hurt to hear it again

Years have passed and your kisses feel

Even better now, soothing my heart still

How my passion fills just knowing that you're on your way home again

[CHORUS:]

We've been through it all

A lot of things girl,

You make my heart just skip a beat in so many ways

Only you I call until this day girl

You make my heart just skip a beat let me count the ways

[VERSE 2:]

Nothing's perfect we still have our days

But that doesn't mean our love will stray

If anything it takes me right back to you

Wishes answered from the very start

Before hello you have left your mark

One so deep I could not remove even if I wanted to

[BRIDGE:]

From your warm embrace to how your kisses taste

The way you look at me, with such sincerity

I feel like every man should feel

I pinch myself to see if it's real

The letters you wrote, even the simple notes

Just you took your time to say what's on your mind

I really couldn't ask for more

Oh yea
