

Cheap Trick, No Mercy

No mercy

In the midnight hush, the restless hours between dark and light

In dreams we come together underneath the cover of the night

You're holding out, but I'm holding on

Can't wait until your resistance is gone

No mercy, accept no defeat

No mercy, 'til you're here with me

Now the pressure's on

You can run away but you can't hide

You might as well surrender, the walls are closing in on every side

I'm getting closer, now, there's no escape

Victory is written all over my face

No mercy, I won't give in No!

No mercy, 'til you let me in

I won't take no for an answer

I won't let go

No mercy, until you let me in

No mercy, no, I'll never give in

No mercy, I won't let you go No!

No mercy, and I want you to know, oh

No mercy
