

Cheap Trick, Special One

Two thousand years gone by and going strong
Well never fear my love it won't be long
You say you've had enough, it seems so wrong
Now it's suicide, oh my love
And now you know just why I'm here
And now my eyes can see so clear
No fear
Where do we go from here? It's in your head
So many tears we'll cry before we're dead
Remember me my love and what we said
I will stand by you all night long
And now you know just why I'm here
And now my eyes can see so clear
Oh baby
Just like the dreams you grow you die
No one pretends to know just why
I feel the calm before the storm
I'm here
Kiss me again before you go
There's somethin' else that you should know, oh
My life will be hell without you, my babe
Oh give all my love, my love
And now you know just why I'm here
And now my eyes can see so clear
And I'll stand by you, oh baby
