Chemical Vocation, Conversus Locus

Will you take me I'm falling Down a hole i dug myself Filled with sorrow and fuckups Don't wanna be a part of that shit.

Standing on the edge of nothing Made my life into a mess Now it's to late to fix it. I'm already starting to lose control

Banging my head into the wall Trying to get rid of all voices inside Is this a dream or is it real?

Ripping my heart out.

I go my way (don't give a damn about you) Your fists don't hurt me Someone said hello Is this true, am I visible? Take my hand drag me out of the crowd

You found me there, in my hole I dug myself You helped me out now my soul lives again
