

Cher, Fires Of Eden

It's not over til it's over
I heard someone say
Must be a whisper in the wind
'Cause you're too far away
But in my restless sleep
I could swear I saw you next to me
Saying , oh I'm coming home
Yuou'll never spend another night alone

[Chorus:]
Remember when love was innocent
There was never a better time
But you know those fires of Eden
Still burn in this heart of mine

The morning's uncertain
It's a nervous day
And I look for a reason
Why I should feel this way
I hear a voice run before
Drifting through my open door
Saying it's alright
We're going to light those flames tonight

[Chorus]
and don't you wonder
How we drifted so far
When we belong to each other
We were miles apart
And there's a place
That was meant for the two of us
And when you touch the embers
You feel my love
As strong as it ever was

[Chorus]
