

# Cher, Silver Wings And Golden Rings

It was Friday night  
And both of us were lonely  
We seemed to meet as lonely people do  
I filled that empty space till Monday morning  
I never meant to fall in love with you  
Came right out and told me  
About your wife back home in Houston  
You were just in town on business  
You never tried to lead me on  
Time had seemed just fine  
Simply love you for the moment  
Heaven help me time ran out  
Now the moment's gone

[Chorus:]  
Silver wings and golden rings  
Are taking you today  
And I'll be dying on the ground  
While you are flying away  
Silver wings and golden rings  
Are shinning on and on  
While the only love  
I've ever known is gone

You made me feel like  
I was something special  
The way no other man ever done  
And I knew last night  
Would have to last forever  
It's just no way of holding back the sun  
And now I guess it's time for me  
To drive you to the airport  
Hold back all my tears  
Tell you it's been nice  
If you come back to town again  
Know I love to see you  
Remember I'm not strong enough  
To let go of you twice

[Chorus x2]
