

# Chicane, Come Tomorrow

Chicane - Come Tomorrow

If I talked to God he'd tell me why  
There's something going on  
Dark people walking by  
This morning is the day after the next  
Escape my only dream  
Cos I'm the only one again  
My life is better spent inside your world  
Butterfly that sings  
Causes me to fall once more  
Tomorrow you are only half a friend  
Machines control your mind  
The neon strips above my head

Come tomorrow  
Come tomorrow  
There's never been an answer  
There's always someone else to follow  
And you are coming down  
And you are coming down  
Giving me the reason for your lies

And when you turn me inside out  
Don't know what you feel or dream about  
And then you take me upside down  
Remember my face, my name, my town  
(Repeat)

When I think of God he knows my mind  
I'm wondering what's wrong  
What will the devil find  
Today it seems the night has come too soon  
Mesmerizing dreams  
A vision of the hells again  
Now my life is better lived insane  
With buttercups that cry and animals that talk to me  
Tomorrow you will find there's no way out  
You've nowhere left to turn  
There's no place left to hide from him

Come tomorrow  
Come tomorrow  
There's never been an answer  
There's always someone else to follow  
And you are coming down  
And you are coming down  
Giving me the reason for your lies

And when you turn me inside out  
Don't know what you feel or dream about  
And then you take me upside down  
Remember my face, my name, my town  
(Repeat)

In a city made of sand  
We found our way out  
But without a helping hand  
We're free...

Turn me inside out  
Don't know what you dream about  
Take me upside down  
Take me, take me

And you turn me inside out  
Don't know what you dream about now  
You take me upside down  
You take me take me
