

China Crisis, Tell Me What It Is

China Crisis
Warped By Success
Tell Me What It Is
(oooh, baby)

Tell me what it is, what it is with me
Tell me what it is, that it is you see
Have i gone blind, i'm loosing my mind
And can it be, don't leave this way
With only myself to take the blame

Never gonna give up hope
Give you just enough to cling to
Room to breathe a hand to hold
All you need now
Never gonna give you up, give up on you, baby
Time alone will heal the pain
Making you well again!

Tell me what it is, that it is with me
Tell me, don't leave things this way
Tell me what it is,
With only myself left to blame
Oh tell me what it is that it is with me

Never gonna give up hope
Give you just enough to cling to
Room to breathe a hand to hold
All you need now
Never gonna give you up, give up on you, baby
Time alone will heal the pain
Making you well again!

Now the sun loves to shine
Through the cloud hanging on the sky
Like the sun loves to shine in our lives
