

# Chris Brown, Moonlight

Levitate in the night, defy gravity  
Meditate, vanilla skies, sex and therapy  
Shooting stars sent from Venus  
Down to Mars, right where you belong  
In my arms, drifting outta space

Is it true that you never flew to nirvana?  
Tonight you gotta  
I love the view when you're in a mood  
The weather's perfect where we lay

Let's make love on a cloud  
You're the moonlight  
Baby, feel your raindrops fallin' down, oh  
Let's make love on a cloud  
You're the moonlight  
It's simple, we'll go where the wind blows (Ooh)

In your supernova, lost control  
Wanna elevate your high, make your soul  
Let's go to a place in the unknown  
Let's go to a place no one can go

Is it true that you never flew to nirvana?  
Tonight you gotta (Gotta)  
I love the view when you're in a mood  
The weather's perfect where we lay (Lay)

Let's make love on a cloud (Hey)  
You're the moonlight (Baby)  
Baby, feel your raindrops fallin' down (Ooh), oh (Oh)  
Let's make love on a cloud  
You're the moonlight (Girl)  
It's simple, we'll go where the wind blows (Ooh)

We can turn the lights down low (Ooh)  
It's the stars that make you glow  
We can turn the lights down low  
Girl, it makes you go (Makes you go)  
We can turn the lights down low  
It's the stars that make you glow  
We can turn the lights down low  
Girl, it makes you go

(Let's make love on a cloud)  
Let's make love on a cloud (Ooh, yeah, ooh, yeah)  
You're the moonlight (Kissin' my baby, yeah)  
Baby, feel your raindrops fallin' down, oh  
Let's make love on a cloud (Ooh)  
You're the moonlight  
It's simple, we'll go where the wind blows (Yeah, yeah)
