Chris Deburgh, Nothing Ever Happens Round He

She was a girl from a one horse town The only place for miles around Cutting hair in the modern style Putting in the nine to five But, every night it was the same old dream On the cover of a magazine She looked good but it could never come true 'Cos nothing ever happens 'round here Nothing ever happens 'round here She had a boyfriend in the town He spent his days just messing around With stick shifts and steering wheels Motorbikes and automobiles And every night it was the same old thing Meet the boys for a couple of drinks Shoot pool and talk about girls And nothing ever happens 'round here Nothing ever happens 'round here They said, nothing, no nothing, no nothing Nothing ever happens 'round here Nothing, no nothing, no nothing Nothing ever happens 'round here One day in a local bar She heard a movie man was looking for a star And everybody in the whole damn town Got the call to come on down And when she walked into the room Every heart went boom, boom, boom, Who's that girl? She's exactly what we're looking for But nothing ever happens 'round here Nothing ever happens 'round here They said, nothing, no nothing, no nothing Nothing ever happens 'round here Nothing, no nothing, no nothing Nothing ever happens 'round here And so she took a screen test No doubt that she was the best The camera fell in love with her Before she knew it she was on the way To make her dreams come true Now she living in Hollywood And everything is looking good She thinks about the folks back home And her boyfriend all alone, but Every night it's still the same old thing Meet the boys for a couple of drinks Shoot pool and talk about girls And nothing ever happens 'round here Nothing ever happens 'round here They said, nothing, no nothing, no nothing Nothing ever happens 'round here Nothing, no nothing, no nothing Nothing ever happens 'round here Nothing, no nothing, no nothing Nothing ever happens 'round here Nothing, no nothing, no nothing Nothing ever happens 'round here
