

Chris LeDoux, Big Love

You need a man to get lost it with a heart big enough to roam
No more fences for you to look through with your heart caught in a strangle hold
I've got a love full of wide open spaces
I've got a big love wild and free room to grow as big as your dreams
Deep as a river in a raging flood endless as the stars above I've got a big love

When two hearts make a stand together on the solid rock of trust
They could be a million miles from each other and still be side by side in love
I want to love you like that forever
I've got a big love...
[fiddle]
You never dreamed you could have all you ever wanted
Darling you can have it with me
I've got a big love...
I got a big love
