

Chris Rea, Firefly

Go to that secret place
Inside your soul
Go to its deepest place
Only you and I know
Can you see her?
There she is still shining bright
When the sun goes down
See her crimson glow through
the darkest of nights
She smiles and says
Everything is alright
There will never be goodbye
While we still see the firefly

The firefly
She smiles and says
Everything is alright
There will never be goodbye
While we still see the firefly

There will never be goodbye
While we still see the firefly
