

Chris Trousdale, The dream is gone

Hey, I just gotta say
Yeah yeah.....Just tell me...
Why did you have to lie?
Can you hold your head up high?
After all this time I'm not your fallback guy
You didn't wanna 'Play'
Baby, I won't take the blame
That's why I must dismiss you
I won't miss you
Cause I don't intend on spending my whole life dreaming
I've been down that street before
It was magic when we met
And I never will forget
Baby after all is said and done
The dream is gone
Cause I just don't understand
We had the future in our hands
Baby there's no way to carry on
The dream is gone
Who said that love was fair?
It's gone beyond repair
If you're thinking of taking me over
Just don't go there
I gave with all my heart
But you tore it all apart
Look how that silly love song
Went so wrong
Cause I've always known I'd go out on my own
Guess it was just a matter of time
It was magic when we met
And I never will forget
Baby after all is said and done
The dream is gone
Cause I just don't understand
We had the future in our hands
Baby there's no way to carry on
The dream is gone
Such a close harmony
But we lost the beat
And now we're so far apart, oh yes we are
Now it's my destiny
Be anything I wanna be
We could have reached for the stars
It was magic when we met
And I never will forget
Baby after all is said and done
The dream is gone
Cause I just don't understand
We had the future in our hands
Baby there's no way to carry on
The dream is gone
No turning back, no no
Such a perfect dream come true
I gotta say goodbye, goodbye
You crossed the line and I don't need you by my side
So long, the dream is gone
