Christopher Cross, Been There Done That

You've seen my face Hey, don't you know my name It wasn't all that long ago I had my fifteen minutes of fame If it was you, caught in a crazy game Would you still look as good standing in the rain Whatever gets you through the night Take it from me, it's gonna be alright Been there done that Been there, then somebody takes you back Been there done that So hard, hard to avoid the trap They break your heart, why do we let them in The drug is strong but the will is weak We make the same mistakes again There comes a time we all gotta rise above Look inside and redefine, just what it is we want from love Been there done that Been there, still working my way back Been there done that So hard, hard to avoid the trap And when you feel strong enough to face up to it You're gonna do just fine
