

# Christy Lauren, Walk This Earth Alone

You're in the doors that keep revolving  
The sirens that keep screaming  
You're in the flashing of the headlights  
The things that i'm believing  
You're in the water that I'm drinking  
The sound of 911  
The walls that protect me  
From the damage that you've done  
In this world you are with me

Chorus:

But I walk this earth alone  
And all I've ever known  
Is you are right beside me  
If I love you for a day  
Then blow my life away  
Could I leave you behind me  
You're in the crashing of the windows  
The angels 'round the ceiling  
You're in the fire in my belly  
The fucked-up way I'm feeling  
You're in the warning on the label  
The pills that disappear  
The whines as I'm talking  
The words you'll never hear  
In this world you are with me  
Repeat Chorus
