## Chuck Berry, My Little Love Lights

This little love-light of mine are you gonna let it shine This little love-light of mine are you gonna let it shine This little love-light of mine are you gonna let it shine Let it shine, let it shine, let it shine With your arms wrapped around me my little love-light

With your arms wrapped around me my little love-light will shine With your arms wrapped around me my little love-light will shine With your arms wrapped around me my little love-light will shine Let it shine, let it shine, let it shine

Someday soon you promised me you'd make my love-light shine Someday soon you promised me you'd make my love-light shine Someday soon you promised me you'd make my love-light shine With a kiss, your arms around me, make it shine Wee, wee hours come and let my love-light shine In the wee, wee hours let my lil' love-light shine In the wee, wee hours let my lil' love-light shine Let it shine, let it shine, let it shine
