## Cipher System, Life Surrounds

In my dreams I've seen brutal scenes of war Acts of sickness and plague spreading around I glorify the ground as I wander The aura of life surrounds me as the day turns to night My life will never be the same again

Emotions control my every thought Emotions make my body change They talk to me from inside The talk and I combine As life surrounds

Strength, don't turn your face from me now Can't you see how weak I am without you Walk with me, walk my path, enjoy the ride As everything goes by I lay my thoughts on you

Like a ticking time machine I'm set to go off Be my enemy, be my friend, by my side until the end

Emotions control my every thought Emotions make my body change They talk to me from inside The talk and I combine As life surrounds
